

Sorting and Recycling Paper and Cardboard

You may have fewer newspapers than in the past, but there will be plenty of magazines to sort, separate and then put in your waste paper recycling collection. There will also be plenty of cardboard from parcels received, and from the kitchen, to break up and put in for recycling.

What To Do

Residents tidy newspapers and magazines. They separate them into separate piles. They put old newspapers and magazines into sacks for recycling. They also break up cardboard and put that into recycling.

Chat about recycling in general.
