Cleaning with Tawashi Sponges

Introduction

Tawashi are traditional Japanese sponges, woven on a simple frame, which are used for cleaning. See our Occupational Activity this month to make these charming cleaning materials.

What To Do

Having made them, put them to good use.

Arrange for bowls of water with washing-up liquid to be available.

Wash small pans, bowls and metal trays.

They can also be used to wash cups, mugs and saucers, and they are great for plates.
